Opening Questions

- Does everyone have a general idea what Drupal is and does?
- Has everyone here logged into a Drupal site?
- If not, do you know how to log in?
- Does your department use Drupal currently?
- Are you an administrator for your department website?

What is a content management system?

- Supports creation and modification of web content
- Generally template-based to maintain consistency and separate design from content
- Made up of a back end administration system and a front end presentation system
- Supports permissions to define roles of different user types

Central Web Support

- CWS is managed by UNT System IT Shared Services
- Offers hosting and support for websites owned by
  - Colleges
  - Departments
  - Administrative units
  - Professors
  - Professional organizations

Central Web Support

- Maintains distributions for UNT and UNT System including recommended modules, themes, and configurations
- Handles updates to system for security or other reasons
- CWS doesn't provide custom design or templating, custom functionality, or content and information architecture
- CWS handles support requests submitted via their online ticketing system at: https://ithelp.untsystem.edu
Drupal Basics

- **Drupal 6 or 7**
  - Drupal 6 at end of life and no longer supported
  - If you haven't already migrated to Drupal 7 you should have a dev site

- **UNT Themes**
  - UNT sites outside of COS and CLASS are built on one of two themes
    - Foundations - new theme that will be used for all sites going forward
